# Preface

About this guide and technical support information.

## About this document

This document mainly provides the users with the available list of the StarFive SoC JH7110.

## Revision History

Table 0-1 Revision History

Version	Released	Revision
1.1	2023/04/17	<ul style="list-style-type: none"><li>Deleted a PCIe type;</li><li>Added a note about "*".</li></ul>
1.0	2023/04/10	The first official release.

## Notes and notices

The following notes and notices might appear in this guide:

-  **Tip:**  
Suggests how to apply the information in a topic or step.
-  **Note:**  
Explains a special case or expands on an important point.
-  **Important:**  
Points out critical information concerning a topic or step.
-  **CAUTION:**  
Indicates that an action or step can cause loss of data, security problems, or performance issues.
-  **Warning:**  
Indicates that an action or step can result in physical harm or cause damage to hardware.

---

# 1. Introduction

JH7110 is a high-performance RISC-V SoC featuring high-performance, low-power-consumption, rich interface options, and powerful image and video processing capabilities.

JH7110 is equipped with a 64-bit high-performance quad-core RISC-V processor core sharing 2 MB of cache coherency, whose working frequency is 1.5 GHz. JH7110 has a rich high-speed native interface, supports the Linux operating system, and has powerful image and video processing system. The StarFive ISP is compatible with mainstream camera sensors, built-in image/video processing subsystem supports H.264/H.265/JPEG codec. The integrated GPU makes its image processing capabilities stronger, such as 3D rendering. With high-performance, OpenCL/OpenGL ES/Vulkan support, JH7110 can further enhance intelligence and efficiency. JH7110 can complete a variety of complex image/video processing and intelligent visual calculations. Also, it meets multiple visual real-time processing requirements at the edge.

星五科技

## 2. Compatibility List

The following table is the compatibility list of JH7110 of each module.

**Note:**

This list just includes the tested devices. If your device is not included in this list, it does not necessarily mean it is not supported, please contact your StarFive sales consultant or technical support for clarification.

**Note:**

√: Full tested, applicable; N/A: Not applicable.

Table 2-1 Compatibility list

Interface	Manufacturer	Type Specification	Description(size)	Status
LPDDR4	Changxing CXMT	CXDB4CBAM-MK-A	2GB	√
		CXDB5CCBM-MK-A	4GB	√
		CXDB6CCDM-MA-M	8GB	√
	BIWIN	BWMZAX32H2A-32Gb-X	4GB	√
